

FUNERAL HOME / CREMATORY

Savings

Year 1: \$7,738

Year 2: \$5,766

Five-Year Estimated Savings: \$33,700

Upfront Cost

Telemetry Meter (Installed by Utility):

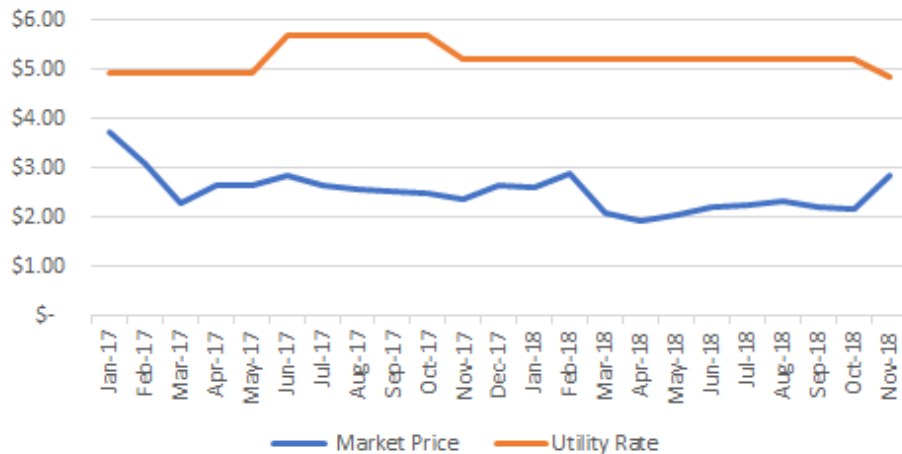

One-Time Cost: <\$5,000

Benefits

- Annual Savings
- **A Fixed Price** You Can Budget

Energy Market Price vs Utility Market Price

How OEM Helped Find Savings

Our Energy Manager (OEM) reviewed this funeral home client's natural gas bills to determine if they qualified for a savings opportunity. Next, OEM helped the client through the paperwork process, making all of the arrangements to have their telemetry meter installed by the utility.

Finally, OEM helped the client find the best possible market price, **locking in their savings** and creating a budgetable natural gas price for a term deal.

Qualifications for Opportunity

Natural Gas Usage: >3,000 MCF per year (30,000 therms or 30,000 ccf) under one meter

Why Does This Savings Opportunity Exist?

Typically, your local natural gas utility company purchases gas based on a predetermined calendar date—which doesn't lead to the best possible market pricing. **Buying at the market allows for better-priced solutions.**
